

Catalogue of product by Residents of SEZ «Lipetsk»

SEZ
LIPETSK

2026

Alexander Bazaev
Chief Executive Officer

Dear guests of the Special Economic Zone of Industrial-Production Type «Lipetsk»!

We present to you a catalog of products manufactured by residents of the Lipetsk Special Economic Zone. It contains high-tech items that are in demand both among large companies and individual consumers.

This catalog will help you learn about the activities of world-class companies with an extremely high level of production, as well as provide a structured overview of the products produced within the territory of the Lipetsk SEZ.

I am confident that this directory will be useful for you!

Reference information of the Lipetsk SEZ

The Lipetsk Special Economic Zone is one of the best and first economic zones in Russia.
The number of sites are 3: in the city of Gryazi, in the Yelets district and in the city of Lipetsk.
Total area of the SEZ: 2,423.35 Ha

Gryazi site

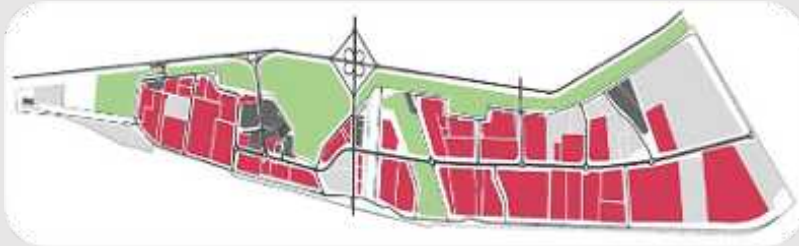

It was established in **2006** (Government Decree No. 782 dated December 21, 2005)
The total area of **1,024 hectares**.

At the moment:

- **51 residents** have been registered at the Gryazi site;
- the total amount of declared investments is **235,74 billion rubles (107,1 billion rubles invested)**;
- the total number of declared jobs is **11,38 thousand people (5,489 created)**;
- **15,662 billion rubles** have been invested in infrastructure.

There are two production complexes for rent on the site.

1. The **5,700 m²** production complex is leased.
2. An industrial park with a total area of **54,000 m²** is under construction.

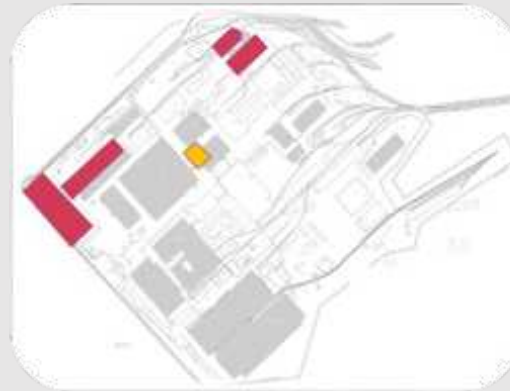

Yelets site

It was established in **2015** (Government Decree No. 697 dated July 11, 2015). The total area is **1,274 hectares**.
5,121 billion rubles have been invested in infrastructure.

At the moment:

- **14 residents** have been registered at the Yelets site;
- the total amount of declared investments is **27,7 billion rubles (21 billion rubles invested)**;
- the total number of declared jobs is **1,1 thousand people (754 created)**.

Lipetsk site

It was established in **2024** (Government Decree No. 278 dated March 07, 2024).

It is located on the territory of the former Lipetsk Tractor Plant, with a total area of **125 hectares**.

There are several production facilities for reconstruction on this territory with a total area of more than **70 thousand m²**.

Our achievements and results

Lipetsk SEZ has received **the status of the BEST** three times, **in 2022, 2024 and 2025.**

It holds **leading positions** in the national ranking of special economic zones of Russia, conducted with the support of the Ministry of Economic Development of the Russian Federation and the AKIT of the Russian Federation.:

- in the VI national rating of investment attractiveness of the SEZ **in 2022 - 1st place,**
- in the VII national rating of investment attractiveness of the SEZ **in 2023 - 2nd place,**
- in the VIII national rating of investment attractiveness of the SEZ **in 2024 - 1st place,**
- in the IX national rating of investment attractiveness of the SEZ **in 2025 – 1st place.**

In the first ESG rating of special economic zones conducted by the AKIT of the Russian Federation in 2023, the Lipetsk SEZ took **1st place.**

The first international forum of Special Economic Zones was held at the Lipetsk SEZ site with the support of the Ministry of Economic Development of the Russian Federation and the ACT of the Russian Federation **in 2023, bringing together more than 150 participants from 5 countries.**

The Lipetsk Special Economic Zone is:

- **winner of the national award** in the nomination **"The best venue for events: industrial facilities".**
- **an active participant in the leading Russian award for the best companies** in the field of business tourism and MICE - the Russian Business Travel & MICE Award.

The Lipetsk SEZ is officially **participating in a pilot project for the development of industrial tourism in the regions** which is overseen by the Agency for Strategic Initiatives and the Ministry of Industry and Trade of the Russian Federation.

Every year, an industrial cycling race is held on the territory of the Lipetsk SEZ, in which more than 400 athletes from different cities of Russia take part.

Starting in 2023, exciting open drift championships of the Drift Battle Series are regularly held on the territory of the Lipetsk special Economic zone with its active support.

LLC «YOKOHAMA R.P.Z»

«YOKOHAMA» - is a world-renowned brand that produces high-quality automobile tires for passenger cars and rubber products for industrial purposes.

Description

- Summer tires,
 - Winter tires, studded/studless,
 - All-season tires.
- Rim diameter: 14–18 inches

Characteristics

- Natural and synthetic rubber,
- carbon black,
- silicon oxide,
- oil,
- metal cord,
- textile cord,
- polyester cord fabrics,
- polyamide cord fabrics,
- silicon dioxide,
- embossed LDPE film.

Гражданские Припасы

LLC «GRAZHDANSKIE PRIPASY»

Automated production of environmentally friendly and cost-efficient plastic encapsulated cartridge cases and components for assembly of civilian smoothbore firearm ammunition.

Description

Plastic cartridge cases of 12, 16 and 20 gauges

Characteristics

Product parts and what they are made of:
Plastic tube – extrusion from polyethylene;
Bottom wad – polyethylene, injection molding;;
Metal base – brass plated metal strip.

LLC «PRESTORUS»

The company manufactures reinforced and geosynthetic gratings for road construction and industry solutions. The products meet the stated physical, mechanical, and geometric characteristics, as well as international standards and are certified.

Description

The products are used to strengthen the soil of roads, slopes, and coastal areas, preventing erosion, soil erosion and pavement deformation.

Characteristics

- GEOKORD® reinforced volumetric geogrid;
- GEOSTEP® and PPR GW® volumetric geogrid for slopes
- Accessories:
 - FAST-LOK fastening key;
 - GEOFORS® composite anchor (any anchor length)
 - ARM-clip™ in combination with metal or composite reinforcement.

LLC «LITUM. LIPETSK»

Litum is Russia's largest manufacturer of industrial, marine and powder coatings, inheriting the quality standards and technologies of Jotun, Hempel, and PPG, with an annual production capacity of 100,000 tons of paint and varnish products.

Description

- Polymer-based paints and varnishes
- Other paints, varnishes, enamels and similar coating materials

Characteristics

Litum materials provide reliable and long—lasting protection for a wide variety of industrial products and facilities, from household appliances to icebreakers.

LLC «NORTEX LIPETSK»

«Nortex» is a leader in the chemical industry in Russia and the CIS, engaged in the production and marketing of chemical raw materials, intermediates and specialized substances. Under «the Northgran» brand, it produces unique high-tech additives for rubber and tires.

Description

- Vulcanizing agents for rubber mixtures
- Rubber Accelerators
- Vulcanization Activators for rubbers
- Adhesion Promoters
- Pre-vulcanization inhibitors for rubbers

Characteristics

Manufacture of components and technological parts for the manufacture of automobile tires and other rubber products

LLC «EGIDA»

The company is engaged in the production of polyurethane foam (PUF) and is a supplier of components for the largest furniture manufacturers in Russia and the CIS, such as Askona, Moon, Hoff. EGIDA produces at least 35% of the country's elastic polyurethane foam.

Description

Elastic PU foam is available in the form of blocks, sheets, rolls, crumbs and shaped products.

Characteristics

- It is used for manufacturing:
- soft elements of furniture and cars;
 - thermal insulation and seals;
 - items of clothing, shoes, mattresses;
 - stuffing toys.

+7 (4742) 24-33-35

lipetsk@egida.ru

<https://egida.ru>

LLC «SHANS ENTERPRISE»

The company produces world-class Russian pesticides that are effective against pests of fields, orchards and vineyards, developing digital agricultural technologies and increasing its presence in the markets of Russia and the CIS.

Description

- Plant protection products (PPP)
- Micro fertilizers

Characteristics

Modern plant protection products and micro fertilizers, tested in various agro-climatic conditions of Russia and the CIS, have proven their high biological effectiveness in increasing yields and improving agrochemical indicators of soil fertility.

LLC «SYNGENTA PRODUCTION»

Syngenta is one of the leaders in the field of plant protection products and one of the leading global seed companies for key field crops, focused on using innovative research and technology for the sustainable development of agriculture.

Description

- Plant protection products (PPP)
- Production of seeds of key crops

Characteristics

Unique herbicides, desiccants and other Lumax brand products are used to protect plants and seeds., Elumis, GardoGold, RegloneAir, RegloneForte are enriched with a high content of active substance, which provides reliable and effective protection.

LLC «CHSZ-LIPETSK»

The main activity of CHSZ-Lipetsk is the production of glass containers for the food and pharmaceutical industries using advanced technology adopted by the world's leading glass factories. The main countries to which products are exported are Kazakhstan, Belarus, Azerbaijan, Uzbekistan, Turkmenistan, Serbia.

Description

Manufacture of glass products

Characteristics

- Bottles, jars, vials and other glass containers, except ampoules;
- Bottles made of colorless, green, brown and olive glass;
- Container volume from 0.20 ml to 1 liter;
- "Double blowing" technology;
- NNPB technology, various shapes and designs;
- Certifications - ISO 9001-2015, ISO 14001-2007, FSSG-22000.

LLC «KEMIN INDUSTRIES (LIPETSK)»

KEMIN is a global leader in the development of innovative products for optimizing feeding, improving the safety and hygiene of animal and poultry feed, including enzymes, antibiotics, antioxidants, emulsifiers, prebiotics and toxin neutralizers.

Description

Feed additives for optimizing digestive processes and increasing the productivity of farm animals.

Characteristics

The use of feed additives improves the quality and safety of feed, improves its digestibility, increases the productivity of farm animals, including birds, and reduces costs per feed unit.

LLC «PETEXPERT»

A manufacturer of cat and dog food, whose priority is the production of high-quality feed from natural raw materials and ingredients, including those with a high content of fresh meat.

Description

Cat and dog food

Characteristics

- 100% balance of nutrients in each granule
- uniform application of fats and oils to each granule
- high content of fresh meat up to 30%
- addition of grain, low-grain and exclusive ingredients

*Stile
di Vita*[®]

LLC «LIPETSK COFFEE COMPANY»

The «Stile di Vita» plant is a large coffee roasting production company with a full—cycle automated production line and an innovative roasting profile repetition system.
The production capacity allows to roast more than 120 tons of coffee per month.

Description

Production of roasted coffee beans

Characteristics

Coffee is produced under different brands.
The products are widely sold both in traditional retail and online.
The production is certified in accordance with European quality standards (ISO 22000:2005).

LLC «SEED PLANT KWS»

iLLC «SEED PLANT KWS» is a member of the KWS SAAT SE & Co. KGaA group of companies, which has been engaged in crop breeding for more than 160 years and is one of the five world leaders in seed production. KWS enterprises are located in the USA, Germany, France, Turkey and Russia and supply products to 37 global markets.

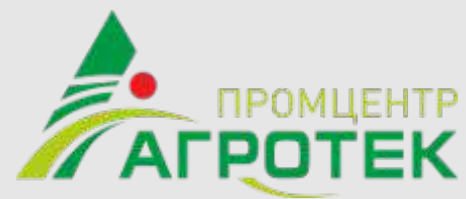

Description Processing (draining) and packaging of seeds

Characteristics The seeds are used for processing:

- sugar beet
- corn
- cereals and legumes
- organic seeds
- sunflower seeds
- rapeseed

TEXHA®

LLC «TEXHA»

The company specializes in the manufacture of poultry farming equipment and high-end fences. The production process uses equipment from leading European brands. The range includes profitable solutions for both large enterprises and private farms.

Description

- Equipment for raising and keeping chickens, broilers, laying hens, parent flock of chickens, roosters.
- Fencing of territories of different functionality

Characteristics

- Poultry equipment is equipped with manual, automatic or robotic unloading.
- Modular systems made of mesh fabric, mounted on metal cross-sectional brackets

LLC «SEST-LUVE»

An enterprise for the industrial production of heat exchangers, evaporators and condensers. To date, the design of heat exchangers manufactured by Sest-Luve is the most advanced in the field of solving heat exchange problems.

The main consumers of the products are manufacturers of commercial refrigeration equipment.

Description

Production of copper, aluminum, and steel products.

Characteristics

- heat exchangers for various applications, convectors for cooling and/or heating, air coolers, condensers, dry coolers.
- component parts for all of the above products.

LLC «BEKAERT LIPETSK»

«Bekaert» is a world leader company in the field of coatings and metalworking, as well as a manufacturer of metal wire and metal cord. The company's products, including wire, mesh and fiber, are widely used in the construction of roads, bridges, tunnels, mines, as well as in architecture and landscape design. Dramix® construction fiber has proven to be an effective concrete reinforcement material.

Description

- Latuned metal cord
- Dramix® 3D/4D steel fiber
- Latuned steel wire with a diameter of 0.15- 1 mm
- Scrap latuned steel wire, m/cord

Characteristics

Metal cord is used for reinforcing passenger and truck tires. Steel fiber is also used to reinforce concrete in industrial floors, an alternative to rebar with improved performance.

LLC «ALU-PRO»

The company is engaged in the production of aluminum profiles, components and accessories used in the manufacture of translucent structures. It supplies products to manufacturers of double-glazed windows and manufacturing enterprises specializing in glass processing. The company has built a strong and efficient sales network that provides the market with a high level of service in Russia, Belarus, Kazakhstan and other CIS countries.

Description

Profiles made of polymer plastic reinforced with glass fiber, with a multilayer protective gas-moisture barrier

Characteristics

The profile material ensures high strength of the skeleton frame and low thermal conductivity. Excellent bending qualities are achieved using special equipment (preheating and automatic welding). It is also possible to assemble the frame using corners.

LLC «LIPETSKIY ZAVOD TEPLICHNYH KONSTRUKCIY»

LLC «LZTK» is a multidisciplinary production facility with modern equipment. The company produces high-quality industrial greenhouses, develops technological systems and innovative equipment for protected soil and creates software solutions for managing these systems.

Description

Production of steel and aluminum structures for glass and film-coated greenhouses.

Characteristics

Along with the manufacture of metal structures, the plant offers technological equipment for greenhouses, provides technical support during installation and during operation. The production capacity of the enterprise is the production of 150 hectares of greenhouse metal structures per year.

LLC «FONDITAL»

Fondital is the world's largest manufacturer of aluminum radiators, gas convectors, boilers, solar collectors, pipes and fittings. The products are matched high international standards and exported to countries including Armenia, Belarus and Kazakhstan.

Description

- Central heating radiators
- Central heating hot water boilers, gas turbine boilers

Characteristics

- Aluminum and bimetallic radiators of the Calidor, Aleternum, Blitz, Exclusivo, Ardente, Alustal and Evostal series are known for their design and different heat output, they are supplied with an axial spacing of 350mm, 500mm and 800mm.
- Compact, wall-mounted and floor-mounted single-circuit boilers are equipped with an open/closed combustion chamber and various power options.

LLC «HERMES-LIPETSK»

«Hermes-Lipetsk» is a major Russian manufacturer of boilers of various types and capacities manufactured using German Viessmann technology, which guarantees high product quality and a leading position in the market. Sheet steel and round-section pipes are used for production.

Description

The products are intended for use in industrial and manufacturing enterprises, as well as at municipal facilities.

Characteristics

The products of the Vitomax LW, HW, HS series are equipped with:

- capacity up to 21.5 MW,
- the standard efficiency is 95.5%
- working pressure of 6.10.25 bar.

LLC «OBO BETTERMANN PRODUCTION»

«OBO Bettermann» is a Russian manufacturer of cable-carrying systems, fasteners, fire protection, lightning protection and grounding devices. It offers more than 4,500 standard positions and individually designed solutions for customers, supporting partners with engineering consultations and in-house testing.

Description

- Cable-carrying systems are used for laying cables for various purposes.
- Fire protection, lightning protection, and grounding devices serve important purposes of improving the safety of buildings, structures, and equipment.

Characteristics

The products are made of galvanized steel.
Galvanizing takes place under using the Sendzimir method (conveyor zinc) or the hot dip method (hot zinc)

LLC «PK RAZIONAL»

рационал
КОТЕЛЬНЫЕ И ТЕПЛОВЫЕ ПУНКТЫ

The company produces world-class patented thermal energy products that allow for the rapid construction of boiler houses and heating facilities of various capacities. The company offers an innovative technical solution for efficient heat supply.

Description

Serial production of boiler houses and heating points

Characteristics

RAZIONAL boiler rooms

- Power: 0.2-35 MW
- Equipped with equipment units R 1-11
- Temperature of heating and technological needs: 45-150 °C
- Hot water temperature: 65 °C
- Working pressure: 6 bar

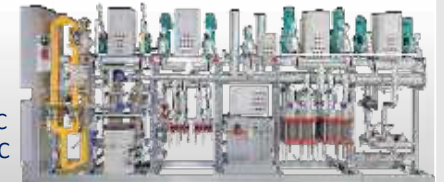

RAZIONAL heating points

- Power: 0.1-25 MW
- Equipped with equipment units M 1-8
- Temperature of heating and technological needs: 45-150 °C
- Hot water temperature: 65 °C
- Working pressure: 6, 10, 16 bar

Boiler equipment systems RAZ 2 – 350

- Power: 0.2-35 MW

LLC «REDALIT SHLUMBERGER»

«SCHLUMBERGER» is a global leader in providing technologies and services for the exploration, drilling, production and refining of oil and gas, offering comprehensive solutions for the entire life cycle of fields, from geological exploration to pipeline transportation.

Description

Highly efficient radial and vortex type stages for the assembly of electric centrifugal pumps used for downhole oil production and liquid pumping.

Characteristics

Submersible electric center modular installations (ECMI) are designed for pumping reservoir fluid from oil wells with a flow rate from 20 to 900 m³/day. The equipment is designed to work in wells with mechanical impurities and combines Western Schlumberger technologies with Russian production standards.

LLC «AVGUST LOGISTIC»

August Logistics is a subsidiary company and the first such investment project of August JSC. The design capacity of the complex is 26 thousand pallets.

The main activity is the organization of logistics activities, storage of plant protection products, the production of which the specialists of "August" are engaged in the territory of Chuvashia, Tatarstan and Belarus.

Description

Organization of logistics activities, storage of plant protection products.

Characteristics

Types of products for storage:

- Mordants
- Herbicides
- Desiccants
- Fungicides
- Insecticides
- Growth Regulators
- Biological products
- Adjuvants and other

Enterprises under construction

LLC «RUNIT-YELETS»

LLC «RUNIT-YELETS» is a factory for the production of ready-to-use dry mixes for restoration and construction, fine-grained concretes and mortars based on hydraulic and air binders, as well as stone plasters, silicate paints, stone fortifiers, hydrophobizers, architectural and mosaic concrete products.

LLC «DIP GROUP»

LLC «DIP GROUP» is a member of the Dally Group, which is a modern, large manufacturer of high-quality and universally applicable products for the production of various confectionery and bakery products. The main clients of the group of companies are food production and wholesale companies from Russia, Belarus, Kazakhstan, Uzbekistan, Armenia, Georgia, Turkey and other countries.

LLC «ELETSKEEPAGRO»

The project involves the construction of a Class A logistics complex with specialized storage facilities for agricultural chemicals, seeds, and other chemicals.

LLC «ZAVOD LIPETSKTECHNOLIT»

«ZAVOD LIPETSKTECHNOLIT» designs and manufactures metalworking machines and spare parts for shot blasting equipment from any manufacturer. This equipment is designed for cleaning metal from dirt and old coatings. The units are in demand in various industries.

Enterprises under construction

LLC «LZVO»

A project for the organization of the production of complete gas-insulated switchgear with a voltage of 110-500 kV.

LLC «PRIME TOP SPECIAL COATINGS»

The production of polyacrylic and epoxyacrylate lacquers for metal painting and protective coatings of packaging and metal products will be organized.

«XIBU INDUSTRIAL Co., Ltd.»

The main objective of the project is to organize the production of refractory products for continuous casting machines, ladle furnace installations, vacuum cleaners and etc.

Enterprises under construction

LLC «AMILOZA»

The project aims to produce amylose starch for food applications including films, coatings, jellies, baked goods and pasta, and will also produce pea protein and dietary fibre.

LLC «SR POLYMER»

The project involves the construction of a plant for the production of polymer packaging: bags, sacks, films, tubular products, containers such as canisters, containers, and buckets.

«JSC «ROSATOM ELECTRIC MOTORS»

The project's goal is to establish mass production of integrated electric drives for electric vehicles and become a leading domestic supplier of components for electric vehicles.
